

Renzo Severino

renzo.severino@outlook.com — renzoseverino.github.io

Economist specializing in causal inference and policy evaluation. Experienced in managing field projects (RCTs), handling large public-sector datasets using Stata and Python, and leading hybrid technical teams. I aim to conduct rigorous economic analysis and translate the results into actionable insights for public policy and private firms.

Professional Experience

Universidad del Pacifico

Adjunct Professor

Lima, Peru

2026

- Teach Introduction to Microeconomics to first-year undergraduate students, develop teaching materials, and supervise up to four Teaching Assistants who lead practice sessions.

Duke University

Researcher / Ph.D. Candidate

North Carolina, USA

2022 – 2025

- Co-Principal Investigator of an RCT evaluating a sex education program in the Peruvian Andes. Responsible for study design, fieldwork supervision, coordination with partner organizations, and leadership of research assistants in the US and Peru. ([Project Page](#))
- Author of a paper about the effect of immigrant presence in Peruvian high schools on the academic performance of local students. Processed and analyzed SIAGIE data, designed of a quasi-experimental identification strategy, developed Python simulations to test robustness, and formulated policy recommendations. Received a USD 48,452 fellowship for the project.

Videnza Consultores

Impact Evaluation Consultant

Lima, Peru

2015

- Conducted impact evaluations of privately led social programs, including initiatives to prevent underage alcohol consumption and improve financial literacy. Designed the school-level sampling strategy for a nationwide Ministry of Education project.

Education

Duke University

Ph.D. in Public Policy (Economics Track)

2025

Universidad del Pacífico

Bachelor's degree in Economics

2015

Technical Skills and Tools

Quantitative Methods: Causal Inference, Randomized Controlled Trials (RCTs), Quasi-Experimental Designs (Diff-in-Diffs, RDD, IV, Synthetic Controls), Impact Evaluation.

Software and Programming: Stata (Advanced), Python (pandas, NumPy, Matplotlib), $\text{\LaTeX}$, R, QGIS

Datasets: Microdatos MINEDU (Censo Escolar, SIAGIE, ENLA, ENDO), Household Surveys from INEI (ENAHO, ENDES, ENPOVE, Peruvian Census)

Languages: Spanish (Native), English (Advanced)
